Sustainability Policy

Carbon Footprint

Leila Event Catering recognises that as event caterers our work does have both a direct and indirect impact on the local, regional and global environment.

We are committed to minimising our negative impacts and by acting in a sustainable way, meeting the needs of the present without compromising the ability of future generations to fulfil their own needs. We hope that by minimising our carbon footprint we encourage our customers to do so as well.

Although at Leila Catering we do not see it as our place to lecture clients on being 'green', we do believe that we can have a significant role to play in raising awareness of green alternatives and helping our clients to achieve their own green policies.

Our green policy is to constantly seek ways in which we can improve our environmental credentials. Our green strategy is aligned with our environmental policy and catering codes of practice on waste and environmental protection.

We focus on:

- Using biodegradable products, cups/trays, etc.
- Using recycled paper, i.e. serviettes, disposable hand towels.
- Reducing waste.
- Reusing materials at every opportunity.
- Repair, rather than throw away, when we can.
- All of our used cooking oil is taken from our depot and turned into biofuel.
